

Wireless Headset

The communications solution for your mobile workforce

The LG-Nortel 8502 Wireless Headset for Office Communicator 2007 allows you to combine the power of Microsoft OCS and Communicator 2007 with bluetooth mobility. Offering users extended talk times and wideband audio the 8502 is the clear choice for business users.

The LG-Nortel Wireless Headset 8502 sets the capabilities of Office Communicator 2007 free. With HD sound, plus impressive range and talk-time, this high-quality wireless headset is ready for a full day's work helping you and your colleagues get connected- without holding a handset or disrupting the office with a speakerphone call.

For 8502 users, Bluetooth® wireless technologies help put productivity in motion, whether they're road warriors or corridor warriors. With a range of 10 meters and a talk-time of six hours, the 8502 extends your office to wherever your people are headed. Just plug the Bluetooth USB dongle into a PC's USB port and use the earbud to get the clarity of wideband audio in a hands-free mobile solution.

For your business, the 8502 is an effective and efficient way to respond to your staff's growing mobility needs. The headset's plug-and-play setup is quick and easy, with no drivers to install. It's built to work with Office Communicator 2007 on a PC but users can even use the 8501 with most Bluetooth enabled mobile phones as their universal headset peripheral.
